

SRINAKHARINWIROT UNIVERSITY  
PRASARNMIT DEMONSTRATION SCHOOL (SECONDARY)

---

EDUCATION IS GROWTH

## UNIQUENESS

Teaching demonstration,  
multiple intelligence oriented

## IDENTITY

Self-Leadership | Accommodation | Assertiveness

## COLOR Grey and Red

Grey represents the brain. Red represents courage  
Grey and Red represents the courage to think freely

## SYMBOL

The exponential function of a graph  
 $y=e^x$  represents infinite growth

## TREE

The Sala tree - Shorea Robusta.  
A rare species and one of Buddhist importance

# Determination

Srinakharinwirot University Prasarnmit Demonstration Secondary School aims to develop itself into a pioneer of prototypical schooling in term of instruction, demonstration of new practices, experimentation, research and promotion of primary education management. All of these will be delivered to the highest level of quality. In addition to this, we will naturalize and develop our students with the moral virtue of discipline, sportsmanship, self-sacrifice for the majority and we will guide the way to make their lives prosperous and fulfilling.

## Mission

- To be a training center providing a professional teaching experience.
- To improve the potential and ability of future teachers.
- To develop an administration program which incooperates the development of student's varying abilities, based on Multiple intelligences theory.
- To research and design educational innovations and to pioneer management in secondary school.
- To be at the pinnacle of secondary education, as well as provide academic services to the community and society.

## School History

Universities are the foundations of the intelligence, inspiration and the knowledge of people in society. A society can develop and prosper only if its people possess these qualities. Inventors, researchers and business leaders are just a portion of our society deemed by others to have a wealth of knowledge and the necessary qualities to succeed. These people gain the foundation of their knowledge at university so you see that universities are a reflection of society; a weak university means a weak system and vice versa. Both are dependent upon each other for success. The Laboratory and Demonstration School is prototypical in educational research and development and offers an environment where the methodology learnt is put into practice. This is a true role model of a prototypical educational institution and is considered a pioneer in conceptual education within Thailand's society.

During the period of Thailand's major revolution in education system, Prasarnmit College of Education was the birthplace of a modern education system in Thailand. Based on the education ideology of Prasarnmit College of Education, the school was established in 1952. The timeline of the school are as follows.

July 3 1952	The school was established under the name of Prasarnmit School.
January 1, 1954	The school was named Prasarnmit College of Education Demonstration Secondary School
1965	Five new buildings were inaugurated. (two buildings for classrooms, two buildings for laboratory and one building for office administration)

January 31, 1966	The School was the first school in Thailand for coeducation.
January 15, 1974	The school's name was changed to Srinakharinwirot University Prasarnmit Demonstration Secondary School
November 12, 2001	Her Royal Highness Princess Maha Chakri Sirindhorn graciously presided over the inauguration of Wittayawirote building
2010	The school opened Satit Prasarnmit International Program (SPIP), SPIP program is accredited by the Thai Ministry of Education (MOE) recognizing SPIP diploma as equivalent to the Thai secondary school certificate and SPIP is able to conduct Cambridge IGCSE and A level examinations and Cambridge Checkpoint tests.
2011	The School launched the Prototype center project aimed at developing the potential of children with special needs.
2012	Her Royal Highness Princess Maha Chakri Sirindhorn graciously presided over the inauguration of new building called His Majesty the King's 80th Birthday Anniversary, 5th December 2007 and Center for special needs children called Sagayawirote Center

Srinakharinwirot University Prasarnmit Demonstration Secondary School has produced numerous high caliber graduates with leadership qualities, intelligence, potential, decency and the will to sacrifice for society. Being responsible for Thai society and the main careers is comprised of, the school operates its system based on;

- Strong principles and ideology of being a research laboratory and essential pilot plant for educational practices and procedures.
- Belief in progressivism that learners are the center of the experience
- Creating leadership qualities for democratic society
- Being a research lab
- Reinforcing the study of the Theory of Multiple Intelligences which is based on the abilities of individual students and creates potential in creativity that leads to new innovations in an individual's life.

## Multiple Intelligences Theory ( MI Theory )

- |   |                                    |    |                            |
|---|------------------------------------|----|----------------------------|
| 1 | Linguistic Intelligence            | 6  | Interpersonal Intelligence |
| 2 | Logical- Mathematical Intelligence | 7  | Intrapersonal Intelligence |
| 3 | Visual-Spatial Intelligence        | 8  | Naturalist Intelligence    |
| 4 | Bodily Kinesthetic Intelligence    | 9  | Existential Intelligence   |
| 5 | Musical Intelligence               | 10 | Moral Intelligence         |

With all the elements that Srinakharinwirot University and Srinakharinwirot University Prasarnmit Demonstration School have to offer, including providing teachers of the highest caliber, support from its alumni, learning materials, technology, a caring and nurturing environment, society can rest assured that this school will be able to produce quality graduates who will live in and be a contributing member of a democratic society. They will exist to help formulate society and their lives which in turn will create a beautiful and harmonious civilization for the future.

Besides the wealth of knowledge, development of the Theory of Multiple Intelligences is also important, its Linguistic, Logical and Mathematical, Visual and Spatial, Bodily and Kinesthetic, Musical, Interpersonal, Naturalist or Intrapersonal; all of which play a part in an individual's leadership development.

Simultaneously, the school encourages students to strengthen their interdisciplinary skills to prepare themselves for higher education facilities through subjects such as Science, Mathematics, French, Hotel Management, Visual Arts, Musical Performance, Performing Art, Physical education and Design.

The school and society are helping to create this dream together. The ultimate dream is to raise the school and Thai society to new height. Srinakharinwirot University and every demonstration school affiliated to Srinakharinwirot University aim to be the best laboratory and pilot plant for pioneering and prototypical education and to help create a democratic society that is second to none.

With 65 years' experience, Prasarnmit Demonstration School is an institution that is representative of the word "quality". The School operates within the education faculty of Srinakharinwirot University. It is an institution that moulds good management techniques by the administrators with sound educational approaches by all the teachers in order to train the students to be knowledgeable in all aspects and to be expert in technology. The teachers plan

the curriculum, develop a range of teaching methods and assess the results. The teachers develop young people to be perfect both physically and mentally, to be able to solve problems, to possess potential in self-development, to be of good character and to be able to use new technologies in order to communicate well. The teachers train the students to become expert, skilled in managing, to love learning by themselves, to be skilled in communication, to be able to work well with each other, to be fair, to have morality, to promote culture, to conserve the Thai lifestyle and to be able to live with others happily.

# School policy

The school provides methodology that encourages students to develop academic skills that'll lead to their improvement in critical thinking, problem solving, communication, collaboration, creativity and innovation.

Instilling knowledge and skills required to prepare the students for the 21st century is based on the principle of 3R x 7C

3R is   Reading

          (w)riting

          (a)rithmetics

7C is   Critical thinking & problem solving

          Creativity & Innovation

          Cross-cultural understanding

          Collaborations, teamwork & leadership

          Communication, information & media literacy

          Computing & ICT literacy

          Career & learning skills

The school curriculum is structured to conform to the 1999 National Education Act and its 2010 3rd issue amendment. In addition, Dr.Howard Gardner's theory of developing the 5 aspects of the brain is taken into account.

Cognitive mind       - Disciplined Mind

                          - Synthesizing Mind

                          - Creating Mind

Interpersonal-Wise   - Respectful Mind

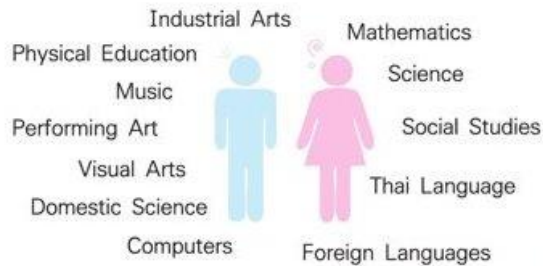

                          - Ethical Mind

Furthermore, the Theory of multiple Intelligences, which is determined by students' unique abilities is being applied in the way the school teaches its students in the following 3 phases:

## 1st phase CONFUSION

Students rotate classes in order to  
"find one's true self"

## 2nd phase CONFIDENCE

gain confidence and select only the  
subjects they are interested in.

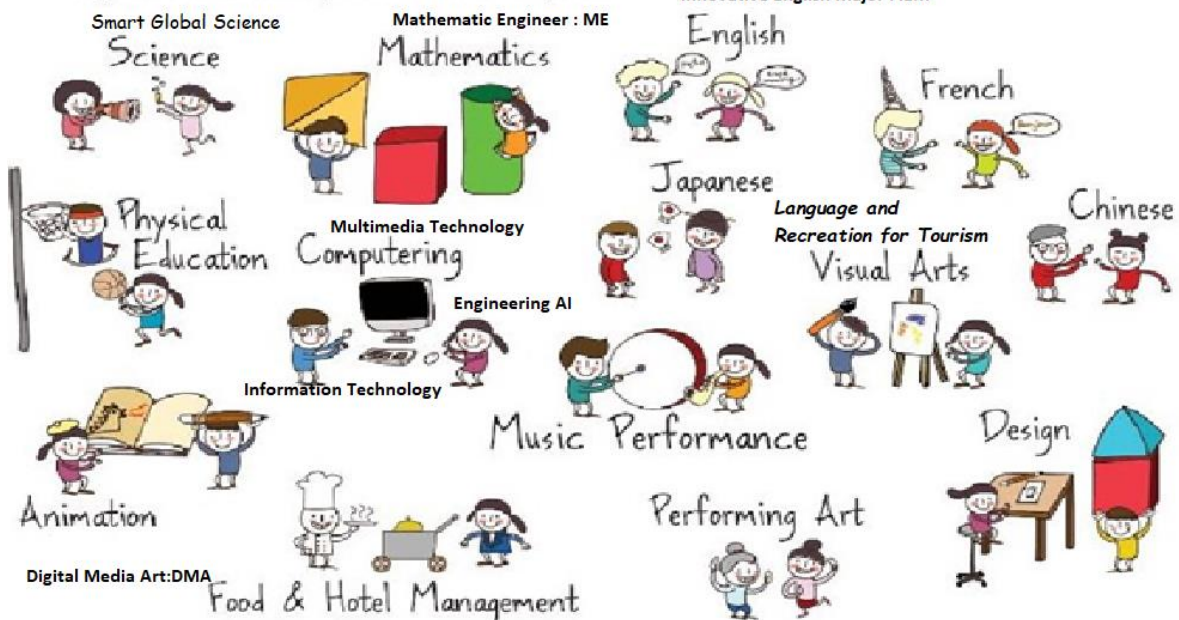

Subjects selected in the 2nd phase:

- Sciences
- Mathematics
- Languages
- Arts & Technology
- Health Sciences
- Music

## 3rd phase DISCOVERY

High school curriculum provides 22 core subjects.

# Special Project

- 2 + 1 Educational program project. That is comprised of studying in Thailand for 2 years and 1 year studying abroad for their senior high school.

-Smart Science Classroom for Junior high school.

Srinakharinwirot University Prasarnmit Demonstration School (Secondary)

## THE LEARNING CLASSROOM MODEL IN DEVELOPING STUDENTS'S POTENTIAL IN SCIENCE TECHNOLOGY, AND INNOVATION

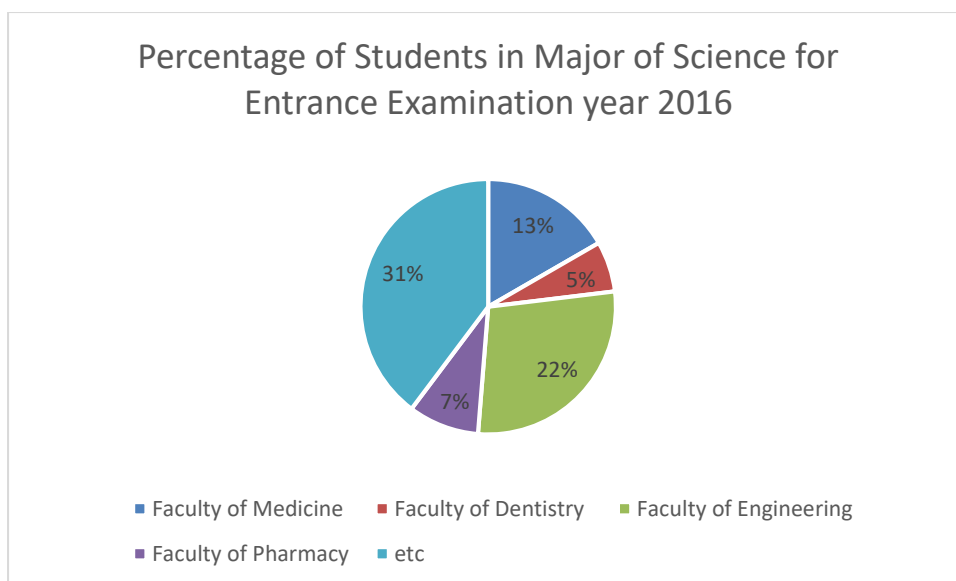

## The Level of Students in the School

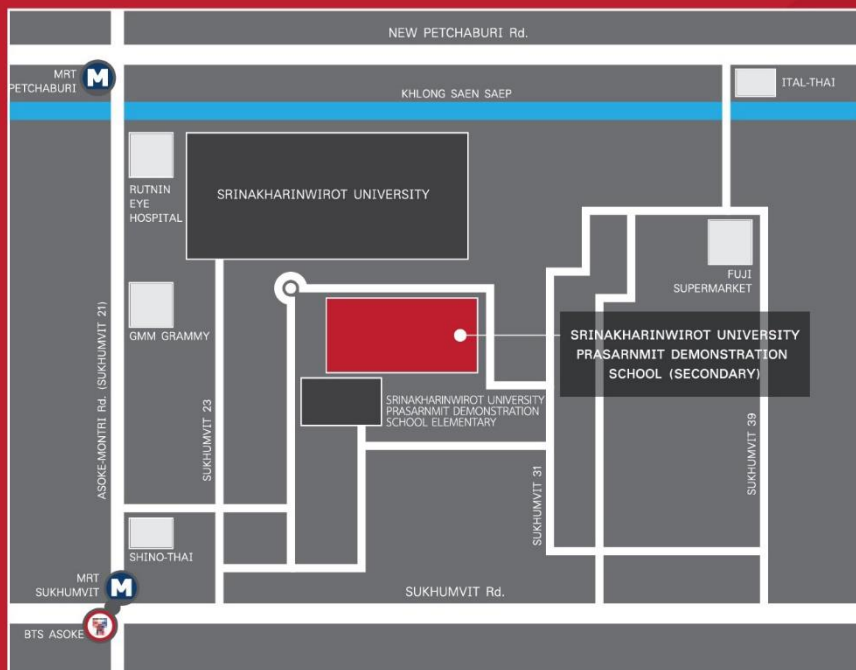

Currently, Srinakharinwirot University Prasarnmit Demonstration Secondary School offers both Thai curriculum and international curriculum for students in grades 7 to 12. There are about 2,300 students together with 160 teachers. The followings are the identity of our students.

Graduates of Srinakharinwirot University Prasarnmit Demonstration Secondary School can pass the entrance examination to the famous university in Thailand. The following are the statistics of Major of Science students' achievement in the national entrance exam for academic year 2016. This statistics based on the total of 110 students who can pass the national examination to the high competitive faculties as shown in the bellowed figure.

From 1952, approximately 20,000 students have been graduated from Srinakharinwirot University Prasarnmit Demonstration Secondary School. Nowaday, they are playing important role in many careers in Thailand.
